

UV-C, HEPA & Ozone Solutions

SPECIALISED FILTRATION SOLUTIONS (HEPA, UV-C, OZONE)

SME offers a comprehensive portfolio of specialised filtration solutions for a variety of industries and applications. The three primary methods of specialised filtration accepted for use in industry is:

- ▶ High efficiency particulate air (HEPA) filtration.
- ▶ UV-C filtration.
- ▶ Ozone filtration.

Careful consideration and care should be exercised when choosing the appropriate method of filtration. Each method has its own associated limitations and benefits as described herein to ensure a better understanding of the selection process.

All three of the above specialised filtration methods have been around for many years and have proven records to demonstrate features and benefits for various applications. Where cleaner environments are provided and harmful micro-organisms such as moulds, bacteria, viruses, and spores are dramatically reduced. The correct filtration solution offers an array of benefits to not only human health, but also the shelf life of produce for human consumption.

These specialised filtration solutions are easily integrated for any application and the large variety of solutions offered by SME enables the client to select the unit which best matches their requirements.

5 - Vehicle / Cabin unit, OR
7 - Low capacity modular unit

6 - Recessed ceiling unit (surface), OR
7 - Low capacity modular unit

SPECIALISED FILTRATION APPLICATIONS

SME offers a variety of UV-C / HEPA specialised filtration solutions for various applications from air to surface filtration. The proposed applications for each of the following units are provided in the table below:

1 – HVAC / ON-COIL UNIT

2 – RECESSED CEILING UNIT (AIR)

3 – HIGH CAPACITY MODULAR UNIT

4 – IN-DUCT UNIT

5 – VEHICLE / CABIN UNIT

6 – RECESSED CEILING UNIT (SURFACE)

7 – LOW CAPACITY MODULAR UNIT

* Ozone solutions to be quoted for on special request.

SPECIALISED FILTRATION UNIT SPECIFICATIONS

Name:	HVAC/On-coil Unit	Recessed ceiling unit - Air	High capacity modular unit	In-duct Unit
Number:	1	2	3	4

SPECIFICATIONS:				
Overall dimensions:	Lamp sizes range from 300 mm up to 1200 mm.	660 x 525 x 250 mm	900 x 335 x 335 mm	1400 x 400 x 350 mm
Weight:	Dependant on the number of lamps and the mounting method.	18 kg	25 kg	8 kg
Power usage:	220 VAC, 50 Hz Total power consumption is different for each unit and is subject to the final design.	220 VAC, 50 Hz 300 Watt	220 VAC, 50 Hz 300 Watt	220 VAC, 50 Hz 300 Watt
Face velocity				Airflow will be provided by the HVAC system. Maximum allowed face velocity of 4 m/s.
Airflow rate:	Airflow will be provided by the HVAC system.	800 m ³ /h	800 m ³ /h	
Specified volume:		150 m ³ to 250 m ³ for three to six air changes per hour.	150 m ³ to 250 m ³ for three to six air changes per hour.	
Lamp replacement:	15 000 hours	15 000 hours	15 000 hours	15 000 hours
Coating:	Unit to be manufactured from stainless steel and will not be coated unless specified otherwise.	Outer lid and frame to be powder coated to the customers' requirements.	Unit to be manufactured from stainless steel unless specified otherwise.	Unit to be manufactured from stainless steel and will not be coated unless specified otherwise.
Filtration:	Surface, however, a degree of air filtration can be expected.	Air	Air	Air, however, if installed near coils it could provide additional surface filtration.

SPECIALISED FILTRATION UNIT SPECIFICATIONS

Name:	Vehicle / Cabin Unit	Recessed ceiling unit - Surface	Low capacity modular unit
Number:	5	6	7

SPECIFICATIONS:

Overall dimensions:	440 x 120 x 80 mm	1500m x 470m x 90 mm	1000 x 260 x 125 mm
Weight:	4 kg	5 kg	9 kg
Power usage:	220 VAC, 50 Hz 30 Watt For vehicle applications, the unit will require an inverter to convert the 12V battery supply to 220 VAC which is required by the unit.	220 VAC, 50 Hz 120 Watt	220 VAC, 50 Hz 220 Watt
Airflow rate:	120 m ³ /h		170 m ³ /h
Specified volume:	20 m ³ to 40 m ³ for three to six air changes per hour.		30 m ³ to 60 m ³ for three to six air changes per hour.
Coverage area:	Approximately 3 m ² at a distance of 1.5 m.	10 m ² at a distance of 2.5 m.	9 m ² at a distance of 2.5 m (only applicable for unit with lamps fitted on the outside).
Lamp replacement:	15 000 hours.	15 000 hours.	15 000 hours.
Coating:	Unit to be manufactured from stainless steel and will not be coated unless specified otherwise.	Unit to be manufactured from stainless steel and will not be coated unless specified otherwise.	Unit to be manufactured from stainless steel and will not be coated unless specified otherwise.
Filtration:	Air and / or surface depending on unit selection.	Surface	Air and / or surface depending on unit selection.

* Option without surface decontamination lamp also available.

** Standard light fitting option also available.
